

Diagnostic Imaging

Site Planning

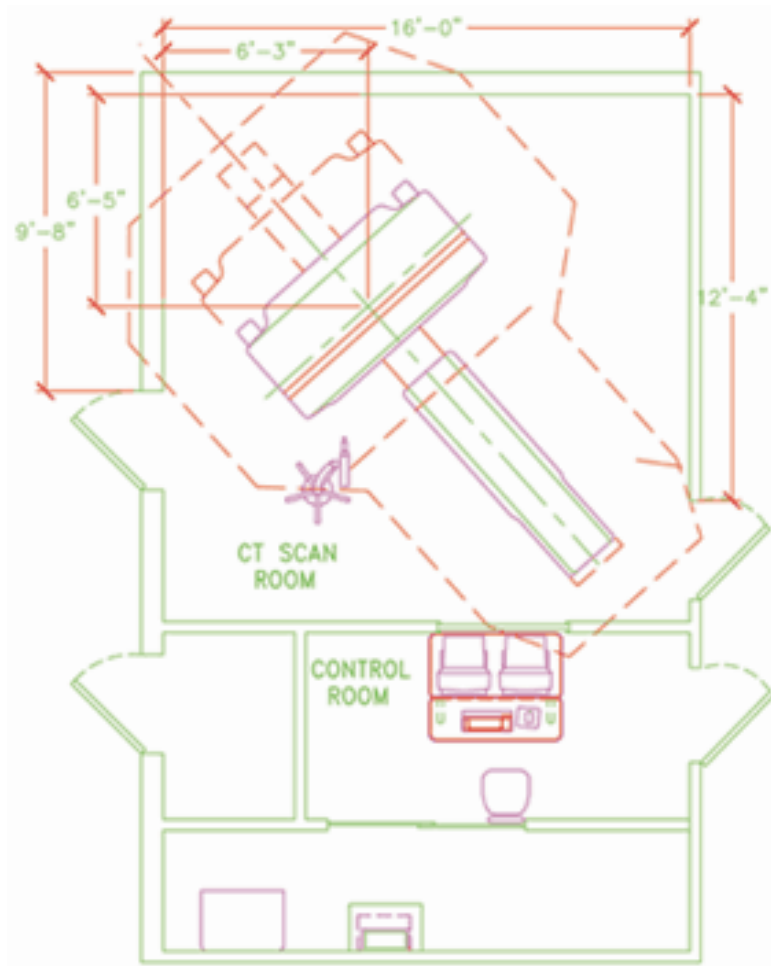

Site Planning

Our extensive knowledge of the equipment, the particular shielding they may require and the safety guidelines and legislature, allows us to site your equipment in the best possible way.

This maximizes the benefits of an excellent layout, as far as technical specifications are concerned, as well as a functional and patient friendly layout as far as the people around the equipment are concerned.

Installation

Installing / de-installing medical imaging equipment under professional supervision:

- PET
- MRI
- CT
- Gamma cameras
- X-ray and Ultrasound, as well as
- Radiotherapy equipment.

RF Shielded Enclosures

We construct and test the special shielding enclosures entirely ourselves. Our shielding enclosures are covered by a 10year warranty.
